

Plexiglass Resources Guide

Plexiglass has been identified as an effective tool to provide a physical barrier between people and to help capture respiratory droplets when individuals are in close contact. Facility Services is manufacturing plexiglass podium shields for all classrooms on campus. For departmental use, there are many freestanding or easily attachable (e.g., to a desk or counter) plexiglass solutions available from suppliers in various sizes. For applications that require custom sizing or permanent installation, a review by LSU Facility Services may be needed and a work order submitted to determine placement, installation, potential ventilation impacts and solutions.

Departments may contact any of the below master contract suppliers to procure plexiglass for their workspaces. A purchase order must be issued for these items either through a non-catalog requisition or punch-out requisition, if available in the supplier catalog. For assistance from LSU Procurement, please contact Amy Bourgeois, ahill5@lsu.edu.

Master Contract Supplier	Product Type	Supplier Representative Contact Information
